VERPLAST®

Compressive Garment

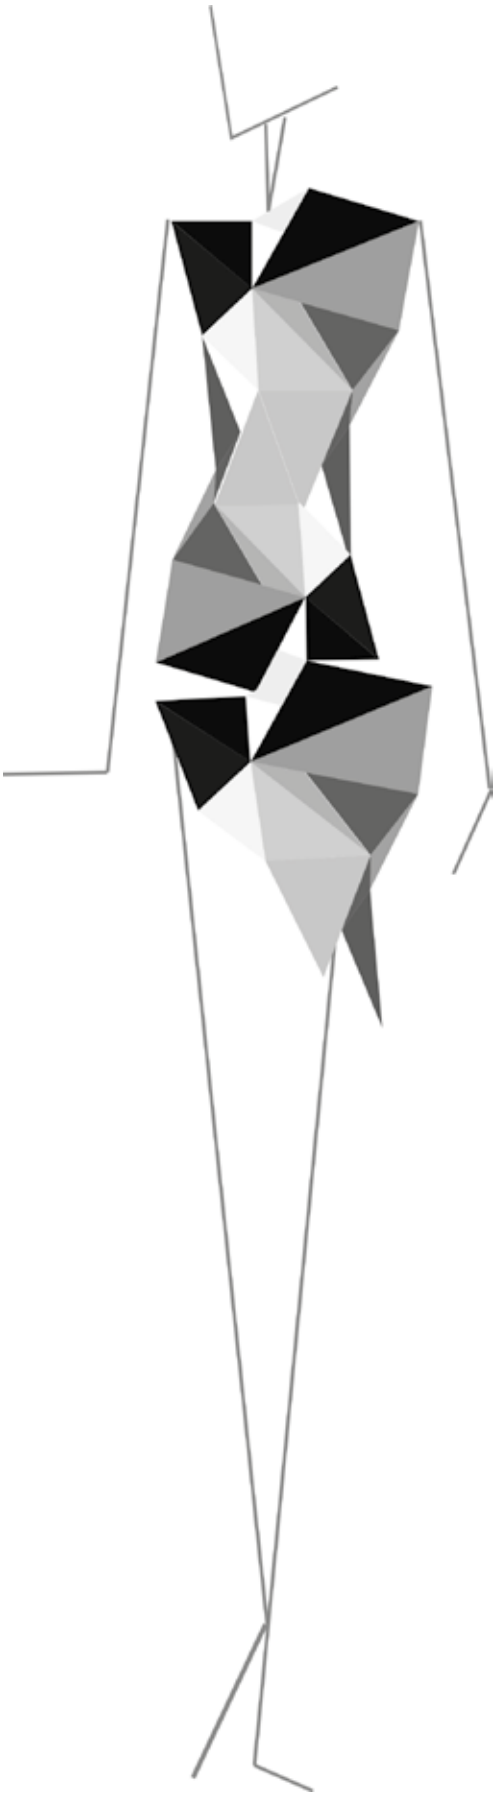

Since 1920 the know-how, experience and creativity in the manufacture of compression garments and corsetry.

Accuracy in the details, tissue quality, technical performance in line with the growing surgical requirements.
Overplast successfully finalizes all types of surgeries: facelift, tummy tuck, liposuction, breast augmentation, otoplasty.

The Overplast sheaths ensure a constant and uniform skin compression throughout the post-operative course, offering a comfortable fit for the patient.
The use of advanced fabrics give the patient a feeling of well-being, protection and lightness.
First choice for the excellence of Italian cosmetic surgery.

Modern medicine uses compression therapies for the following

Reasons
To minimize swelling, bruises and the occurrence of keloid scars.
To reduce the risk of infection.
To shape the contours and stabilize the implants.
To reduce pain.
To speed up the healing process.

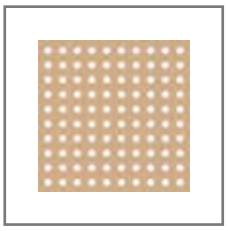

Benefits
Defined ductility and elasticity Maintain a stable microclimate environment Antibacterial and hypoallergenic effect.

Eliminate the occurrence of unpleasant odor Microfibers take excess moisture away from the body Light and pleasant to the touch, making long-term wear easier.

Distinctive and soft texture constantly “massages” scars and thus speeds their healing. Latex-free. Flat seams do not put strain on the operated parts.

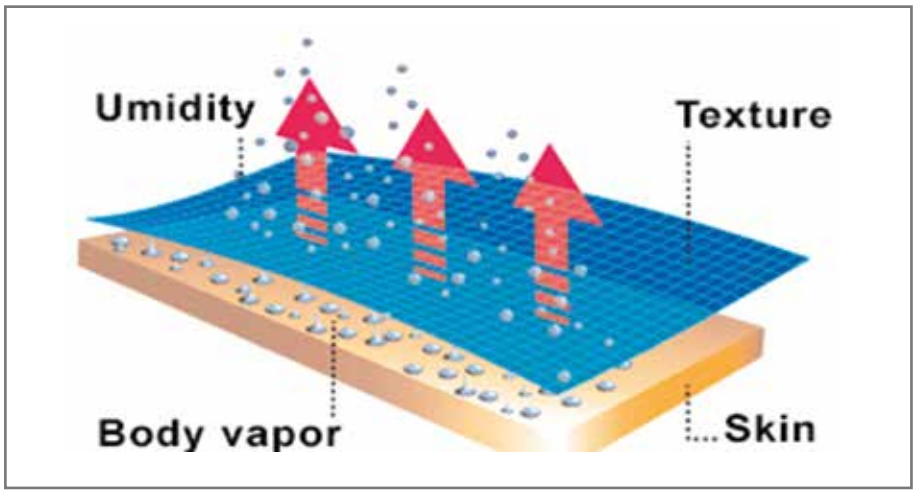

Overplast garments guarantee the required compression ranging between 20~30 mmHg.

Washing istructions
The Overplast compression sleeves can only be washed by hand in warm water (do not exceed 40 °) with a mild soap and avoiding the use of softeners.

- Do not iron

- Do not dry clean

- Spread out in a horizontal position

- Dry thoroughly avoiding sun and other direct heat sources (radiator)

Note: High temperatures can compromise the elasticity of the Overplast girdles and therefore their effectiveness

Disposal
The compressive garments Overplast must be disposed of in accordance with the european directive 94/62/CE. (I loghi li invio su w.app).

Reg. Ministry of Health n° 1547006 – CND M030405

Medical Device Class I – Compliant to the european directive 93/42 EEC

LIPOSUCTION

The main properties are:

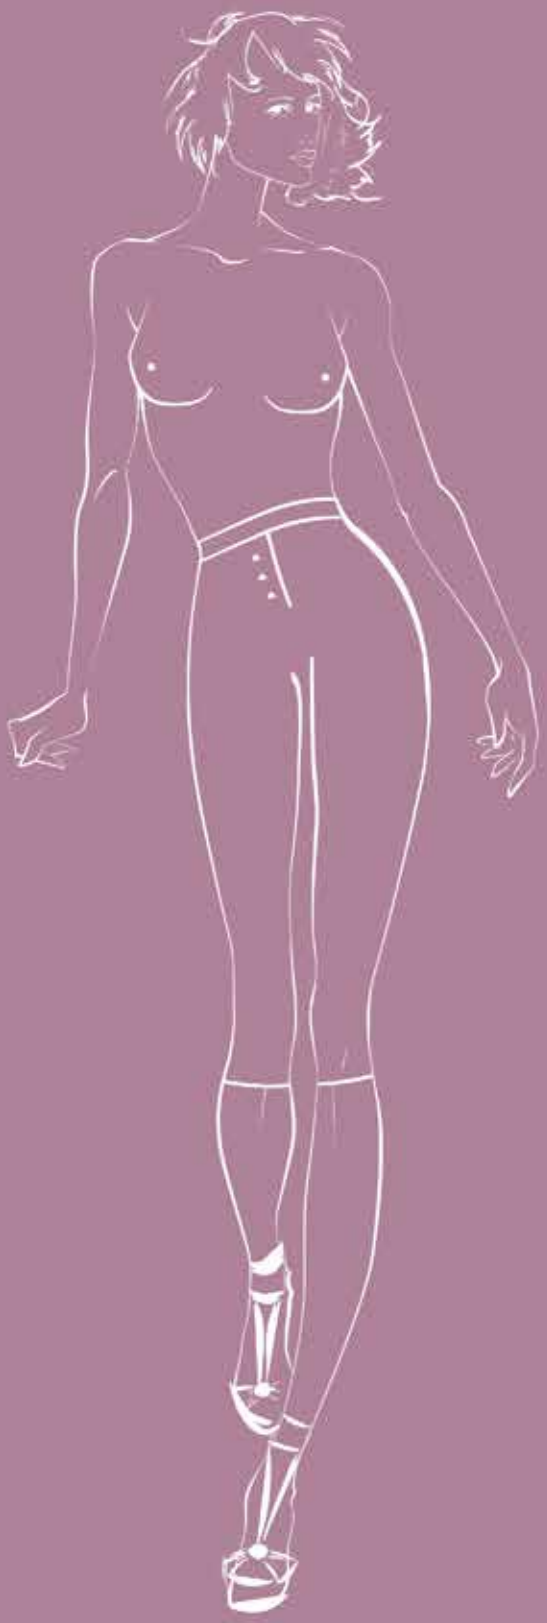

- Elasticity of compression and containment; the compression is carried out in all four directions to ensure containment in any position assumed by the patient.

- Resistance: the Overplast sheaths never lose their shape initial also after several washes; they are researched and designed to be h24, 7 days on 7, then necessarily subject to continuous and frequent washings.

- High breathability and absolute non-allergenic; it does not alter the natural body moisture to evaporation processes: promotes maintaining the feeling of fresh and dry skin and minimizes the risk of irritation leading an itch and redness skin (issue encountered frequently in sheaths with traditional fabric). The hems at both ends of the sleeves, ensure the patient to enter but not contact chat with the outer fabric, ensuring the high comfort and avoiding itching.

Overplast sheaths presents microfiber and other fabrics innovative grado to ensure maximum breathability, hypoallergenic and while high comfort for the patient. The microfiber and a fabric composed of 58% from stretch nylon (family of polyamides synthetic) and 42% lycra (elastomeric fiber with unique properties of elongation and recovery of the original shape).

The Overplast sheath are invisible under clothes and provides a proper post-operative recovery.

Overplast provides Panty Girdle Long and Short Ankle, foot including.

Panty short under knee

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52 - 54 - 56
Composition: 84% poliammide, 16% elastan

All male and female garments with trouser legs have a hygienic opening to increase daily comfort.

Panty short above knee

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52 - 54 - 56
Composition: 84% poliammide, 16% elastan

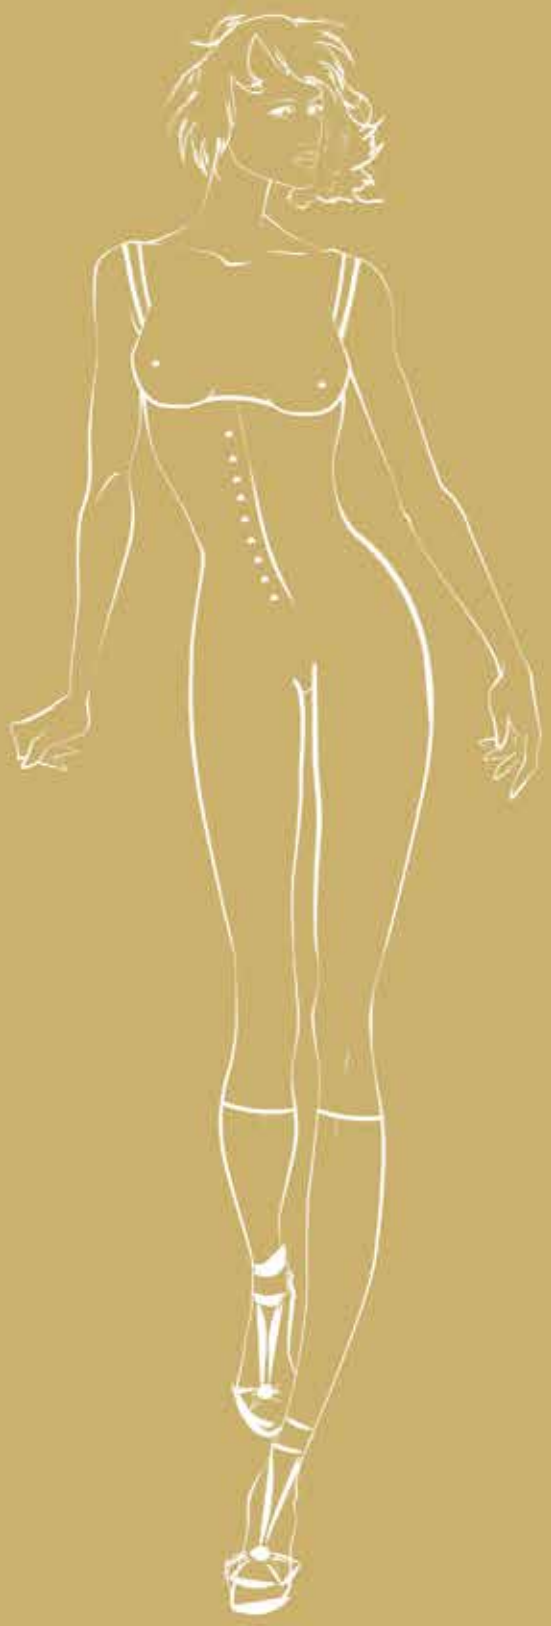

All male and female garments are available with closure in hooks or velcro.

Panty long ankle

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52 - 54 - 56
Composition: 84% poliammide, 16% elastan

LIPOSUCTION & ABDOMINOPLASTY

What is a post-surgical body?

The body post-surgery is an elasticized containment sheath used to reshape the body after an operation of liposculpture or liposuction. It allows the skin tissue to keep in touch with the muscular part and then get the silhouette desired.

There are allergy problems?

No, in fact, contact with the body of an elastic sheath it gives an immediate sense of comfort and comfort. It does not irritate the skin because the inside the fabric it is very smooth and soft.

What are the short anti-cellulite?

Anti-cellulite shorts are special elastic sleeves as within them employ silicone. With the normal movement of the legs, the silicone exerts a continuous massage which allows a reduction of cellulite localized on the thighs of 20%.

Overplast provides Panty Girdle Long and Short Ankle, foot including.

Mid-Thigh Girdle

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52
Composition: 84% poliammide, 16% elastan

Girdle short knee

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52
Composition: 84% poliammide, 16% elastan

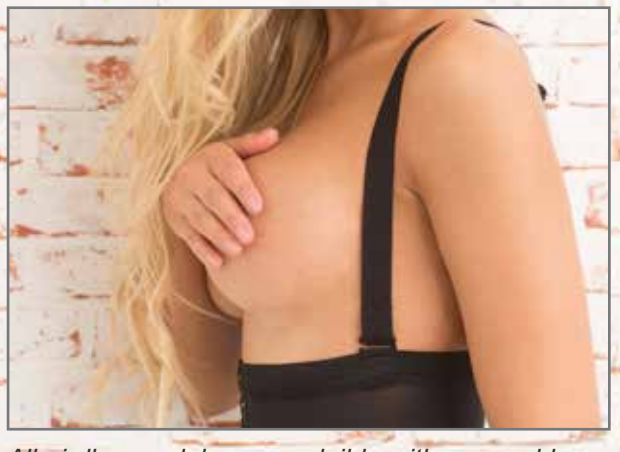

Girdle long knee

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52
Composition: 84% poliammide, 16% elastan

All male and female garments are available in three different colors: white, black and skin.

All girdles models are avalaible with removable or fixed shoulder strap to support the scar's medication such as Reoil.

Girdle long ankle

Benefits: Easy donning with effective compression.
Closure available with hooks or velcro
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52
Composition: 84% poliammide, 16% elastan

REOIL

A great natural source of *vitamin C*, indispensable to ensure that the body remains in good health as it not only acts as an antioxidant protecting against free radicals, but also protects against infection, it helps to heal wounds and promotes a good cell growth. Among the various nutrients that Reoil contains, in addition to *vitamin C* it is worth mentioning the following: *vitamin A*. Also known as retinol, it can help combat oily skin, dehydrated skin from sun exposure, expression lines, wrinkles and skin irregularities of the skin in general.

The linoleic acid.
It helps preserve the natural barrier of the cells, and is vital to the structure of cell membranes. It is a fatty acid omega-6.
The oleic acid. It is a fatty acid omega-9, and helps to make the skin soft as well as hydrated. In addition, it improves the general condition of the dermis.

Lycopene.
It is an antioxidant and protects the skin from free radical damage, thus reducing the risk of premature aging.

The beta-carotene.
It is a source of pro vitamin A, in addition to being a potent antioxidant. It helps to improve the appearance of skin damaged by the sun and can also help prevent the signs of aging.
Reoil for surgical and traumatic skin scars
If used on surgical scars, Reoil must be applied after the sutures were removed and the wound is completely healed.

After washing the area, apply the oil on dry skin with a gentle massage. The effects will be evident after 3 or 4 months, and the skin will recover its elasticity, in addition to significantly improve also the color of the scar itself.
As regards, however, the old scars from trauma or injury, will take longer to see the effects, and everything will depend upon the age of the scar itself, by its location and age of the person in question. Two or more abundant applications per day are recommended.

Reoil and fatty acids.
Reoil is a very rich source of essential fatty acids, indeed, one can say that it is constituted by fatty acids to as much as 80%. These substances are essential to regenerate skin cells and to repair the tissues of the dermis. Polyunsaturated fatty acids are important for the synthesis of prostaglandins, which are substances responsible for skin renewal. For this design of a product is used especially for the improvement of the face and body skin.

Who can use Reoil? And how is it used?
Reoil can be used by anyone at any age. Because he rebalancing skin, it can be used both by those who have dry skin and those who have oily skin, and in addition will not clog pores, allowing the skin to breathe. All skin types, therefore, may benefit by Reoil.
Using ideal of Reoil would estimate, since in this way can seriously reduce premature aging. If you already suffer from blemishes and wrinkles, Reoil can be applied daily to help contain the damage and to make it appear healthier skin.

Reoil against stretch marks.
Reoil, acting on the skin damage, looks like a good ally also against stretch marks. In fact, it applied daily, tones the areas affected by stretch marks that are also often accompanied by loss of elasticity. In case of stretch marks, the oil must be applied morning and evening, using circular and soft massages. The first results are beginning to be seen after two months of continuous use.

Ingredients:
Rosa Moschata Seed Oil, Argan Oil, Inca Inchi Wo Oil, Chamomilla Recutita Flower Extract, Vitamin E.

PREGNANCY & ABDOMINOPLASTY

What is a post-surgical body?

The body post-surgery is an elasticized containment sheath used to reshape the belly after pregnancy or liposculpture to reduce the risk of stretch-marks and scar's keloids.

It allows the skin tissue to keep in touch with the muscular part and then get the silhouette desired.

There are allergy problems?

No, in fact, contact with the body of an elastic sheath it gives an immediate sense of comfort and comfort. It does not irritate the skin because the inside the fabric it is very smooth and soft.

Abdominal girdle

Benefits: Easy donning with effective compression with adjustable velcro closure
Sizes: S - M - L - XL - XXL
Composition: 25% poliammide, 10% cotton, 65% elastan

Abdominal band girdle

Benefits: Easy and fast donning with effective compression with modulable two or three bands
Sizes: S - M - L - XL - XXL
Composition: 25% poliammide, 10% cotton, 65% elastan

Abdominal long girdle

Benefits: Easy donning with effective compression with adjustable velcro closure
Sizes: S - M - L - XL - XXL
Composition: 25% poliammide, 10% cotton, 65% elastan

Culotte

Benefits: Easy donning with effective compression.
Closure available with hooks only
Sizes: 38 - 40 - 42- 44 - 46 - 48 - 50 - 52
Composition: 84% poliammide, 16% elastan

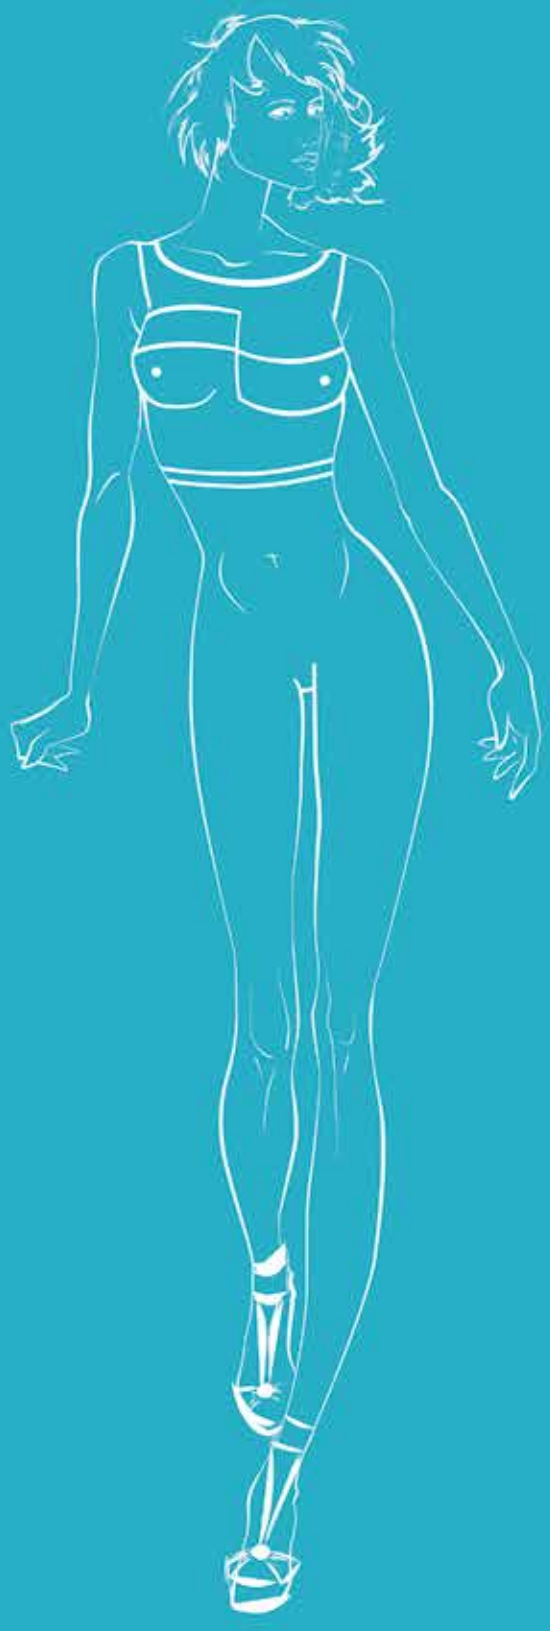

BRA

What are the post-surgical bras?

The post-surgical bras keep the breasts up, separated and in the form that the surgeon wanted to impress. The innovative front connection through hooks allows you to adjust the voltage and then to decrease pain after augmentation.
It also helps rest better in the hours of sleep.

How long you need to wear a post-surgical sleeve after the operation?

Normally we can say that the best results in a surgical operation is reached after three months after surgery. We say so that at this time would be absolutely indicated always wear the sheath.

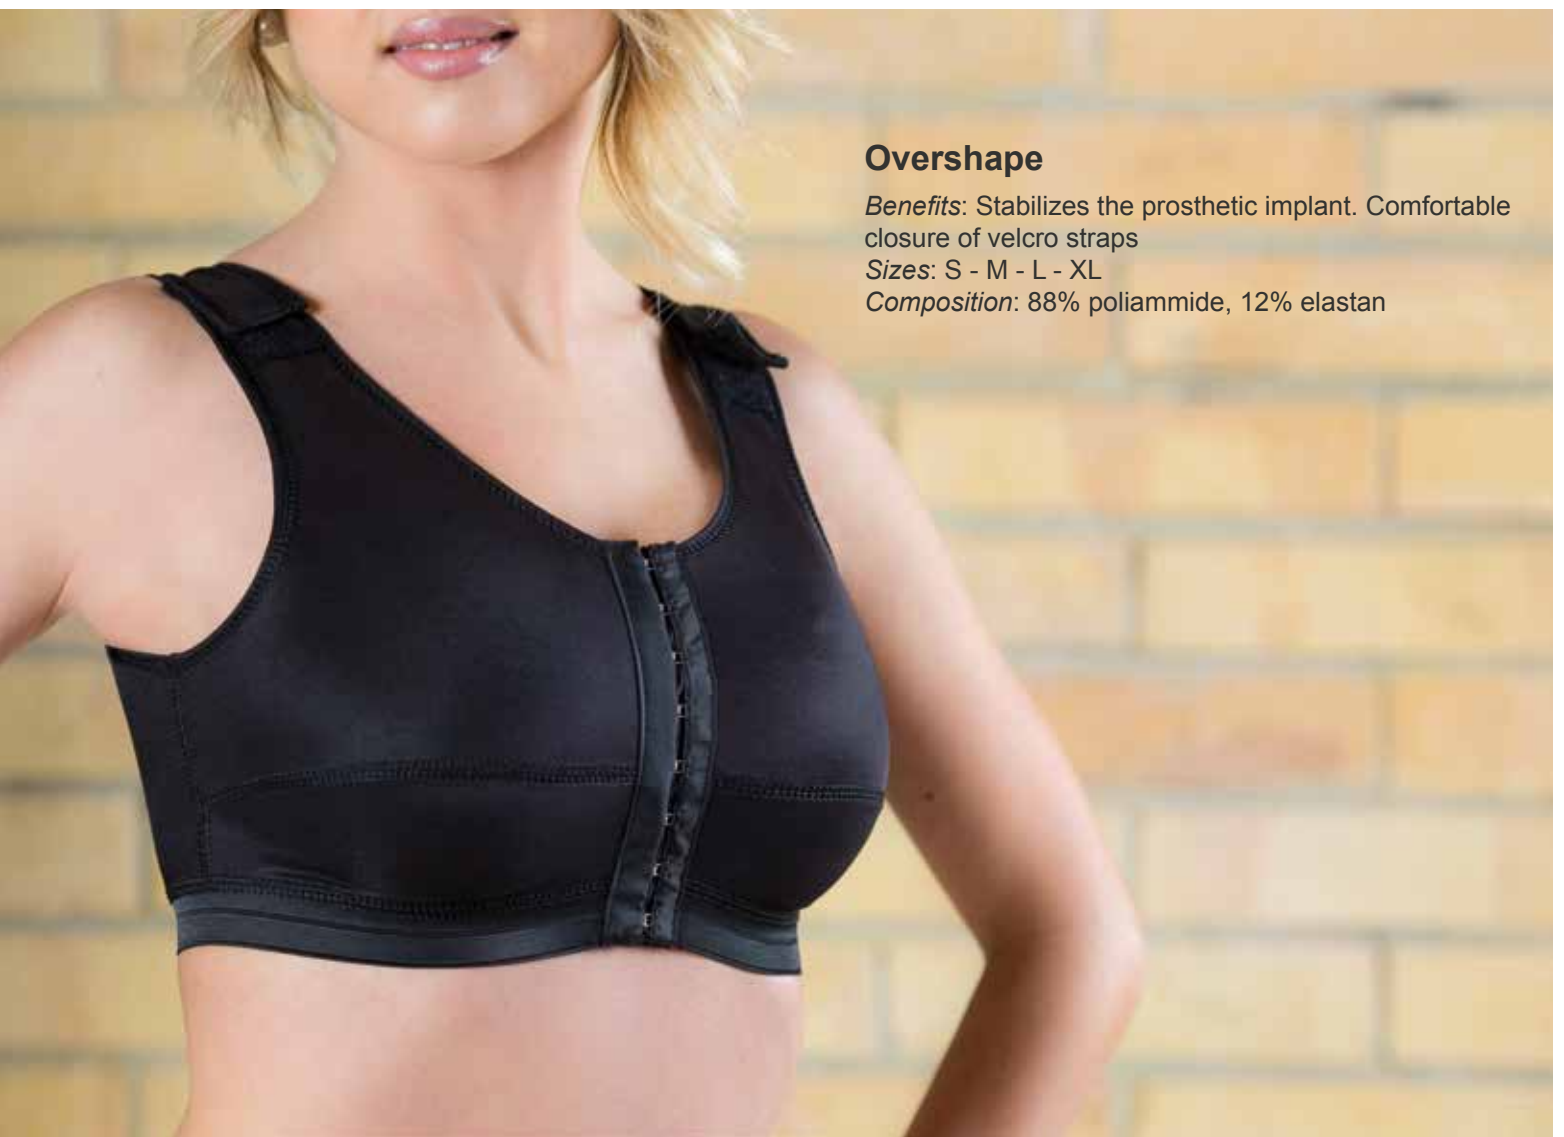

Overbra

Benefits: Versatile model with elastic band to be positioned according to the post-surgical needs. Stabilizes the implant
Sizes: S - M - L - XL
Composition: 88% poliammide, 12% elastan

Oversplit

Benefits: Stabilizes the prosthetic implant to remain free of the space between the breasts
Sizes: S - M - L - XL
Composition: 88% poliammide, 12% elastan

Overshape

Benefits: Stabilizes the prosthetic implant. Comfortable closure of velcro straps
Sizes: S - M - L - XL
Composition: 88% poliammide, 12% elastan

Implant support bra

Benefits: Stabilize the prosthesis ensuring a high compression of tissues, supported by the support of an underbust band

Sizes: S - M - L - XL

Composition: 88% poliammide, 12% elastan

Support asymmetric bra

Benefits: Indicated for breast asymmetries, supporting high-compression straps with Velcro closures comfortable

Sizes: S - M - L - XL

Composition: 88% poliammide, 12% elastan

Strapless

Benefits: Stabilizes the prosthetic implant with the aid of an adjustable elastic band. Model strapless

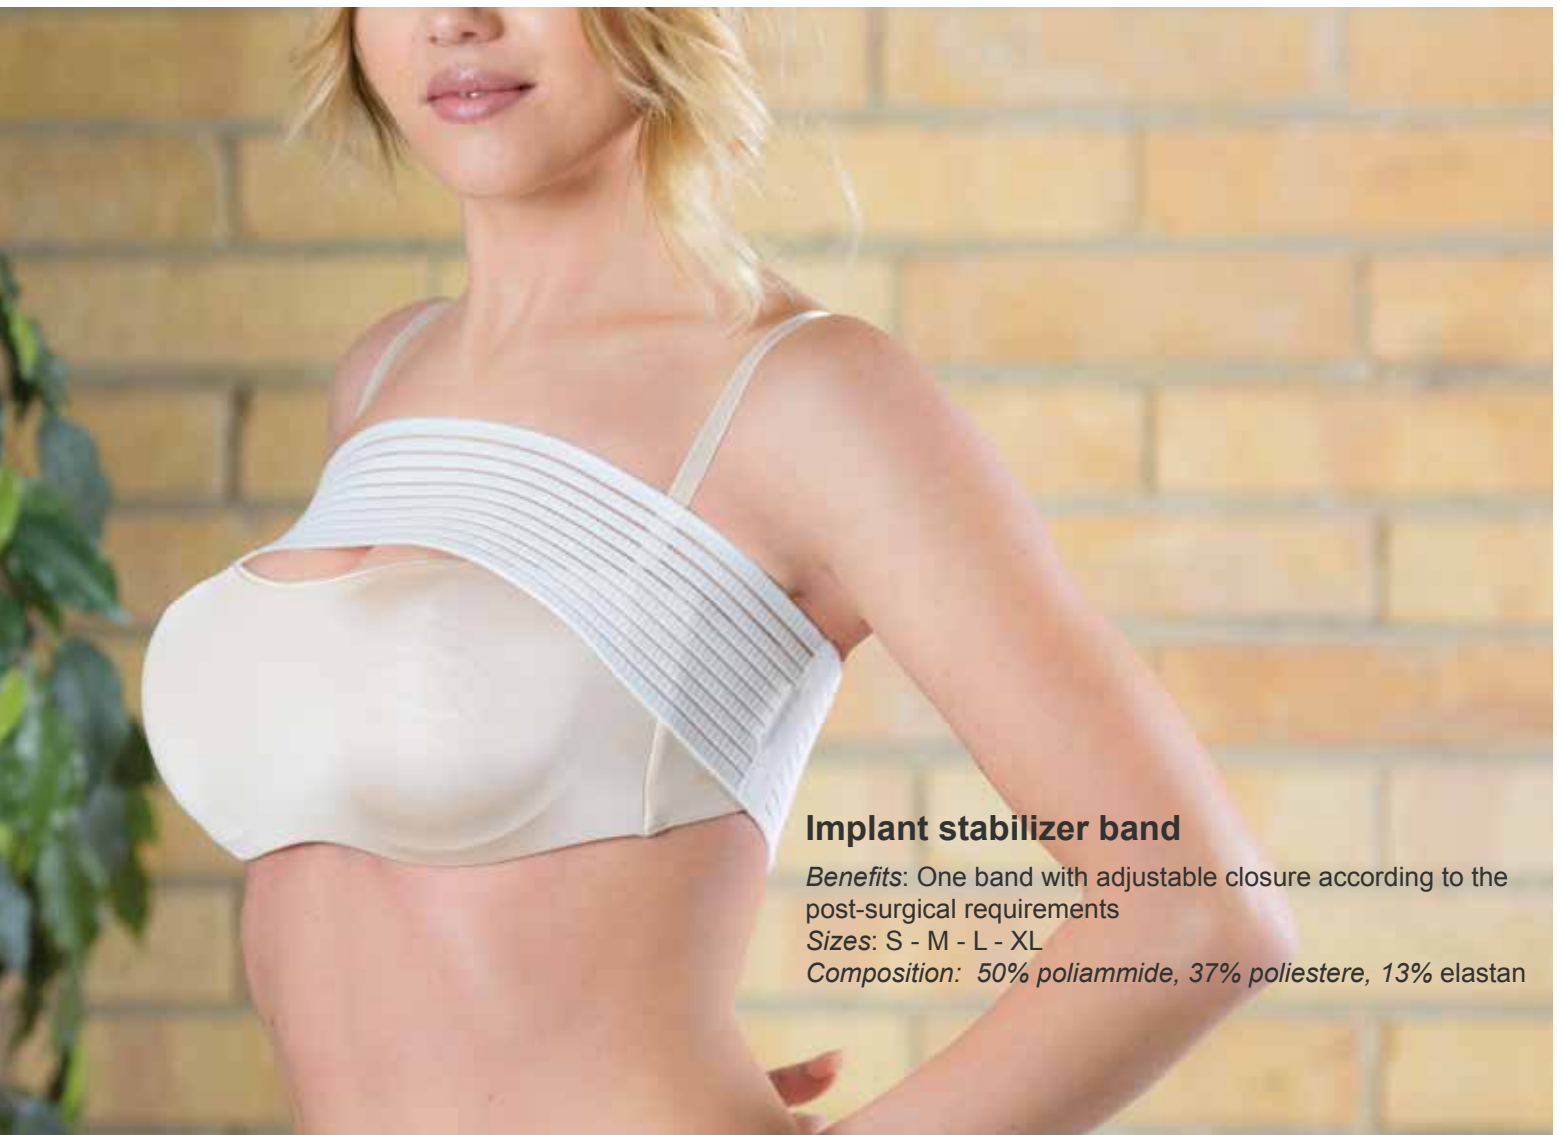

Sizes: S - M - L - XL

Composition: 88% poliammide, 12% elastan

Double Stabilizer Band

Benefits: Two stabilizing bands with adjustable closure according to the post-surgical requirements
Sizes: S - M - L - XL
Composition: 50% poliammide, 37% poliestere, 13% elastan

Implant stabilizer band

Benefits: One band with adjustable closure according to the post-surgical requirements
Sizes: S - M - L - XL
Composition: 50% poliammide, 37% poliestere, 13% elastan

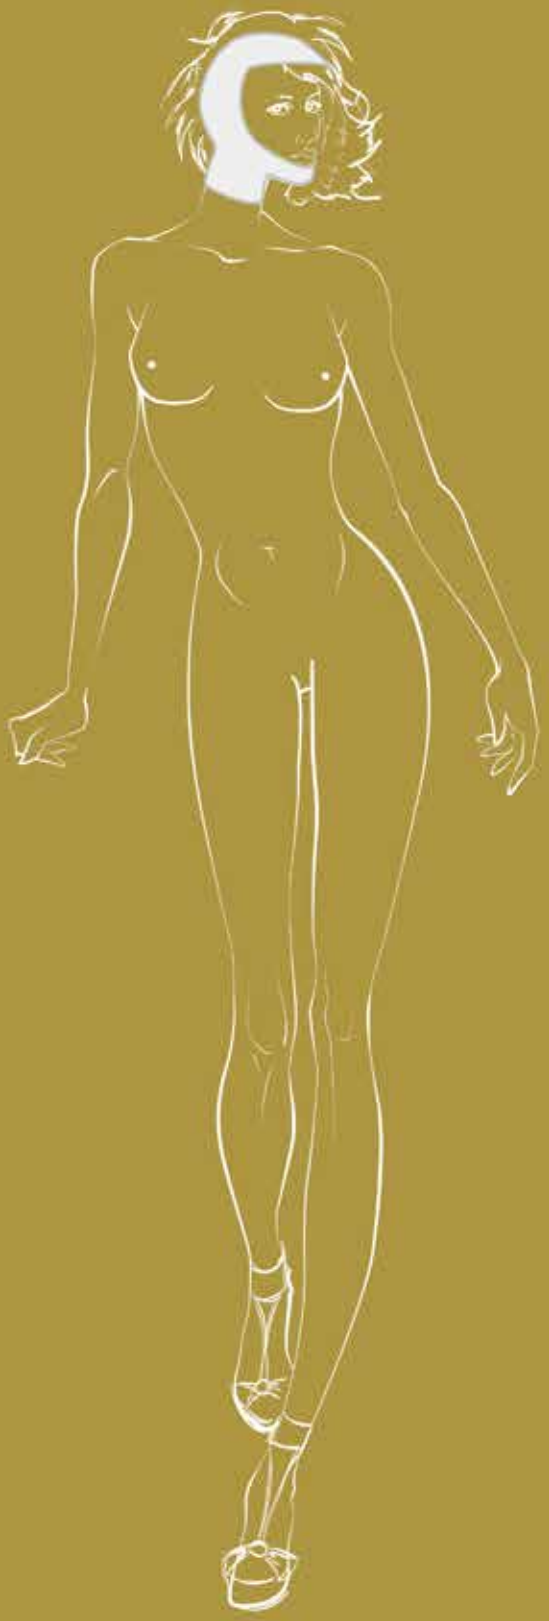

All bra are available in three different colors: white, black and skin.
The most of all bra are available with shoulder strap.

MASKS

The innovative design and easy to use with adjustable strap.

For face lift, liposuction of double chin and otoplasty. The wide lateral velcro straps mean the support can be altered to suite the type of intervention and patient's shape.

The fabric will not run, this allows the physician to make an incision over the ear so the support can be maintained.

Otoplasty

Otoplasty

Benefits: High compression with adjustable velcro closure
Size: Standard
Composition: 84% poliammide, 16% elastan

Face Lifting

Face lifting

Benefits: High compression with adjustable velcro closure
Size: Standard
Composition: 84% poliammide, 16% elastan

Mentoplasty

Mentoplasty

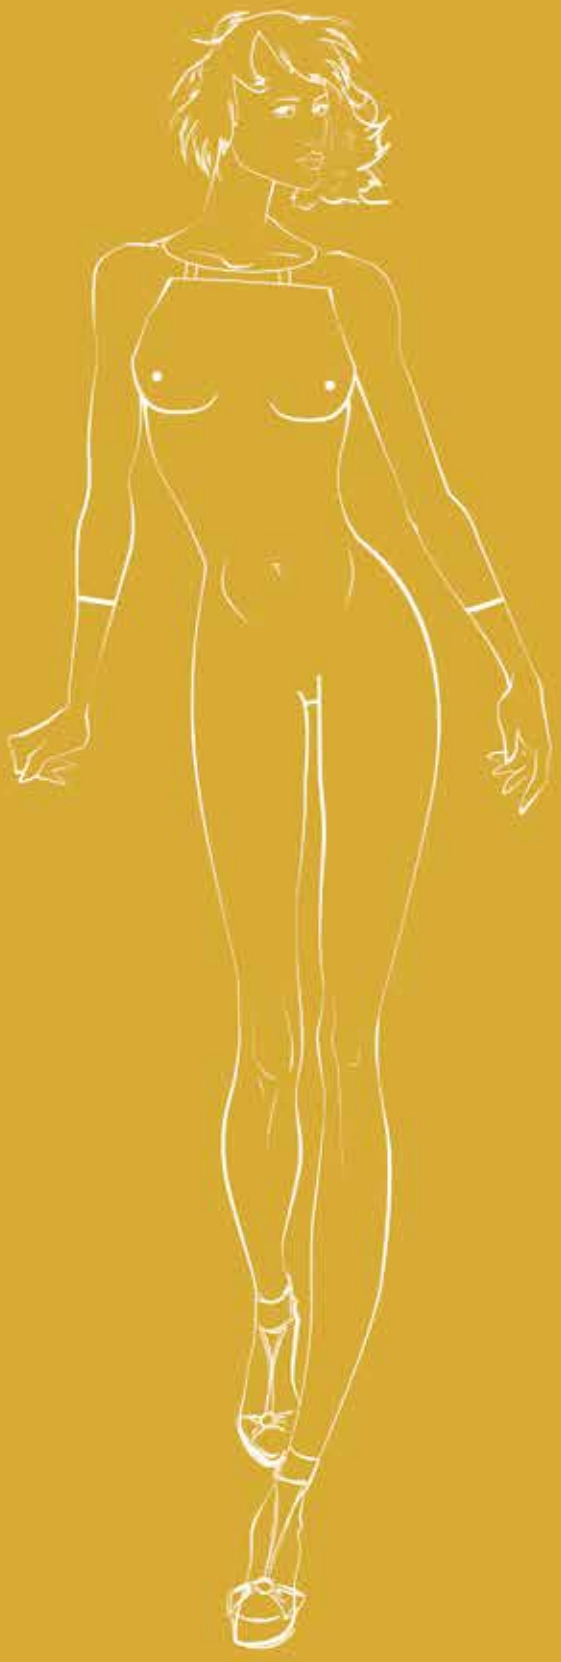

Benefits: High compression with adjustable velcro closure
Size: Standard
Composition: 84% poliammide, 16% elastan

SPECIAL MODELS

Our laboratory is able to meet any surgical needs manufacturing specific model with special features.

We can use different type of texture in according at surgeon demand.

Brasserie

Benefits: Full garment to meet the mastoplasty and arm liposuction's needs
Sizes: S - M - L - XL
Composition: 84% poliammide, 16% elastan

Overarms

Benefits: It is indicated for patients who have had an arm lift. Excellent comfort and support
Sizes: S - M - L - XL
Composition: 84% poliammide, 16% elastan

MAN'S GARMENT

The man's bolero is used after male breast reduction (gynecomastia).

It will assure an optimum compression of the tissue post surgery.
The models can be available with two differfent closures:

- unique central closing
- double lateral closing

both of them with velcro or hooks finishing, according surgeon's request.

Bolero

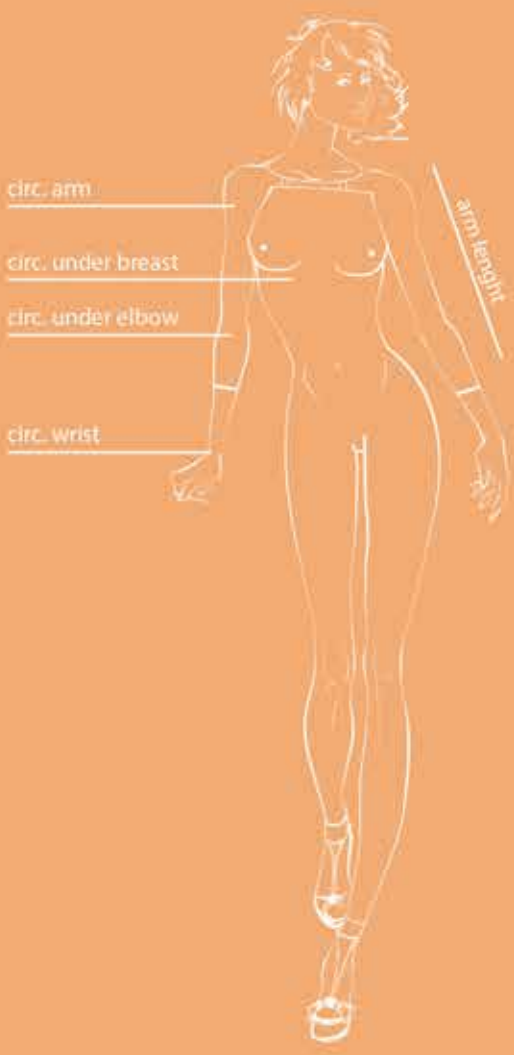

Benefits: Easy donning with effective compression
Sizes: S - M - L - XL
Composition: 84% poliammide, 16% elastan

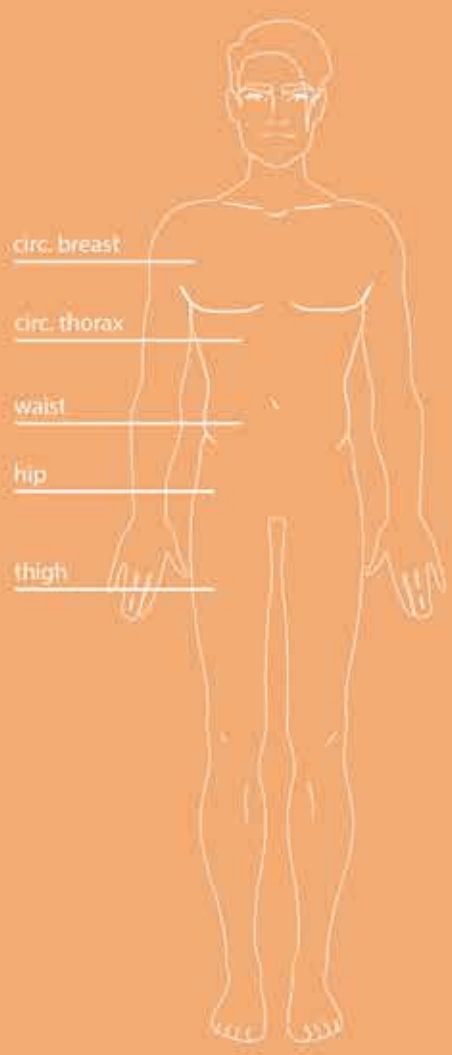

Body man

Benefits: Easy donning with effective compression
Sizes: S - M - L - XL
Composition: 84% poliammide, 16% elastan
